

# LEAD PRODUCT PLATFORM ENGINEER

4th August 2025

**Cortex**

Dear Cortex,

Hello!

This job sounds exactly like me!

Throughout my career, I've built out internal platforms while also delivering production, customer-facing systems. My long experience delivering these customer-facing systems, as well as my storied experience in different environments, has been invaluable in figuring out what Platform to build to give engineers delivery leverage.

I'd love a chance to discuss this role!

Sincerely,

Jason Felice
