

SENIOR SOFTWARE ENGINEER, C++, SEARCH

22nd July 2025

Splunk

Dear Splunk,

Hello!

I'm an experienced hands-on (read: coding) principal engineer who has been a tech lead on many, many projects.

I've built many systems, some of them distributed, and have been the person brought in to debug the worst of the worst unexplainable problems—including quite a few that were latent for years and blamed on external circumstances.

I naturally end up mentoring in every position, largely because I have a super broad background and am approachable. When necessary, I build presentations and socialize ideas that can improve our organization technically.

Some of Splunk's software I've used and deeply appreciated in the past, and I'd love an opportunity to work on it and with the teams.

Sincerely,

Jason Felice
