

STAFF SOFTWARE ENGINEER, FULL STACK

24th July 2025

PathAI

Dear PathAI,

Hello!

I'm a top-tier, weathered engineer who knows how to get projects delivered in challenging environments while mentoring engineers and building organizational capability. Bringing up code standards is a big part of my daily push, especially testing, which I've given several talks on.

I have collaborated with data science, ML, frontend, API teams, product, infrastructure, and the customers themselves. Working to ensure all stakeholders' needs are met is normal for me.

Additionally, I'm familiar ML models and how to operationalize them..

I have not worked with the regulations for medical devices, though I have worked under HIPAA, SoX, and PCI-DSS regulations for various projects.

Sincerely,

Jason Felice
