Flex

Dear Flex,

TL;DR I am a cross-stack, hands-on, top-tier engineer (as well as an actual human being and not a robot) and I'd love a chance to work with Flex.

I'm no stranger to any of the areas you've mentioned in the listing: I've done payment, billing, identity, and partner integration work. I've done significant scaling work, including distributed systems work.

And I was the CTO of a small 7-person technology consulting firm from 2000-2007. This required me to do sales and quoting, requirement translation, coding, making the coffee, and bringing up engineers.

I estimate that I have 25 years of Java.

I'm asking \$213K, which is what you've posted for NY/NJ/CA but less than Ohio, where I reside.

Sincerely,

Jason Felice
