

SENIOR BACKEND ENGINEER

8th August 2025

LaunchDarkly

Dear LaunchDarkly,

Hello!

I think you'll see from my resume my enthusiasm for improving software delivery at scale:

- Implementing CI/CD from end-to-end for inherited services.
- Building new tools for mobile CI/CD.
- Facilitation and mentoring to uplevel the team.
- Advocacy for organizational change when the tech organization is mis-aligned with delivery goals.

As a Principal Engineer, I've owned many products and initiatives. The most common comment I've gotten from management is, "I appreciate that I don't have to manage you."

I would love an opportunity to discuss this role!

Sincerely,

Jason Felice
