Staff Software Engineer, Core Infrastructure

30th July 2025

Moveworks

Dear Moveworks,

Hello!

I've owned, designed, or rolled out many of the features in your posting in the past: A/B testing, feature flagging, configuration management, as well as observability. I've built many high-performing services and microservices and delivered them on time.

I'm also able to work autonomously–and it usually ends up that way because I can do it and managers have so many things to manage.

I'd love a chance to talk about this position!

Sincerely,

Jason Felice
