Principal Software Engineer

31st July 2025

Conceal

Dear Conceal,

Hello!

The technical requirements for this position look almost exactly like my previous position: Docker/Kubernetes/AWS (RDS, EC2, S3, Cognito, DynamoDB), microservices, CI/CD implementation, Terraform, Github Actions, and working with system security were all part of my position at 2U.

I'm *particularly* well-versed in languages, listed at the top of my resume, with experience in Python and Rust, and expert-level with Java and C++, in addition to Clojure, Ruby, Elixir, TypeScript, JavaScript, and quite a few others.

I've used my communication skills to mentor and to shape the orgs I work in, especially at Groupon, Blue Frog, 2U, and Cronosys.

I'd love an opportunity to discuss this position!

Sincerely,

Jason Felice
